SUBJECT: Tumor Registry Non-Reportable Cases

SEE ALSO: CPDMS Manual and MR70-09, Tumor Registry Reportable Cases

INFORMATION

The purpose of this procedure is to inform Tumor Registrars how to decide if the case is not reportable according to the CPDMS Manual requirements.

PROCEDURE:

Patients NOT required to be reported:

1. Patients who are seen only in consultation to confirm a cancer diagnosis or treatment plan and no treatment was provided by our facility.
2. Patients who receive transient care to avoid interrupting a course of therapy initiated elsewhere, for example, while vacationing or because of equipment failure at the original hospital.
3. Patients whose medical record indicates a history of cancer only, and who were diagnosed prior to our 1991 reference date.
4. Patients with in situ or localized neoplasms of the skin.
   Neoplasms of the skin (ICD-O Topography codes C44.0 to C44.9) with the following ICD-O Morphology codes are not reportable:
   M8000-8004 Neoplasms, NOS
   M8010-8045 Epithelial neoplasms
   M8050-8082 Squamous Cell neoplasms of the skin
   8090-8110 Basal Cell neoplasms of the skin
5. Patients with preinvasive neoplasia of the cervix.
   Cases of Intraepithelial neoplasia grade 3, of the cervix or prostate (M8077/2) are often designated by terms such as CIN3 or PIN3.
